

The Virtual Conservatory presents:

Hearing Tonal Music

A multimedia textbook for aural skills

This groundbreaking instructional resource for collegiate aural skills training and college preparatory studies in music features over 3700 conservatory-grade ear training exercises and complete, concise explanations of tonal harmony, conveniently integrated within one software package. *Hearing Tonal Music*—powerful, versatile, comprehensive.

Powerful:

- Professionally engineered, rich software functionality, including notation-entry interface, analysis-entry interface, evaluation routines with intelligent scoring, and full feedback.
- Automated record keeping and reporting of student scores.
- Four hours of professionally recorded music carefully selected from throughout the literature of tonal music.
- Superior sampled sounds—no hardware synthesizer required.

Versatile:

- Designed for use in class as well as practice outside class. If used for teaching, virtually eliminates preparation time!
- Modular organization facilitates use of materials in almost any order. May be studied in conjunction with any harmony textbook or independently.
- Preference settings afford maximal flexibility of use.
- Perfect for self-paced or private teacher-guided harmony and ear training studies at the secondary level. Virtually guaranteed to save on college tuition and shorten degree programs!
- Runs on PC and Macintosh computers.
1024 x 768 screen resolution; Pentium III PC or later; Power Macintosh G3 or later, System 9.2 or X or later.

Comprehensive:

- Over 2000 rudimentary meter, scale, interval, and chord identification exercises; over 1000 harmonic dictation exercises; over 700 aural analysis, or real-music dictation, exercises. Introductory through advanced—all the ear training materials you'll ever need!
- Interactive summary harmony textbook containing over 450 model progressions covers every syntactical harmonic usage found in tonal music.
- Free, continuously updated supplementary tutorials available at our website.
